750-6 Ikawadani-cho Junna, Nishi-ku,
Kobe, Hyogo 651-2124
FAX : 078-978-6761

ADDITIVE MANUFACTURING

Supporting various materials for molding

Sodick OPM250L

High precision machine equipped with a 500W Yb Laser

Moldable dimensions : 250×250×250mm
Moldable materials (stocked at our company) : Maraging Steel,
SUS420J2
Gas : Nitrogen
Maximum powder supply mass : 90kg
Maximum laser output : 500 W (Yb Fiber Laser)
Laser irradiation method : Galvano scanner

CONCEPTLASER Mini-LabR

Handling a variety of materials for the manufacturing of end-use components

Moldable dimensions : 90×90×90mm
Moldable materials (stocked at our company) : Aluminum alloys,
titanium alloys, stainless 304, stainless (17-4PH)
Gas : Nitrogen, argon
Maximum powder supply mass : 5kg
Maximum laser output : 100 W (Fiber Laser)
Laser irradiation method : Galvano scanner
